

# The CS60-HC Series Companion Scanner

Be ready for any healthcare workflow, today and tomorrow

## The ultra-versatile convertible scanner

Corded, cordless, handheld or hands-free... it's whatever you want it to be. Need to switch modes? No problem. You can change any time to meet any workflow.

Cordless companion scanner

Corded handheld scanner

Corded presentation scanner

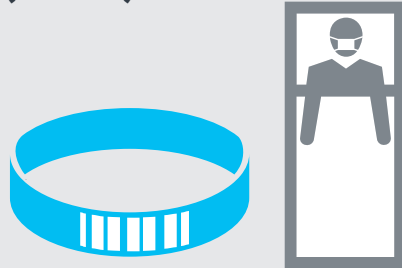

Cordless scanner with cradle

## Meet more of your healthcare scanning needs

How can you put the CS60-HC to work in your operations?

Positive Patient Identification (PPID)

Medication administration

Inventory management

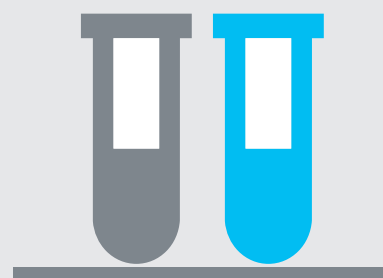

Pharmacy

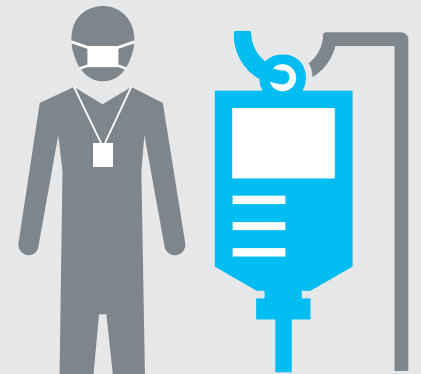

Electronic Medical Record (EMR) access

Specimen collection

Phlebotomy

Convertibility brings big benefits to healthcare

**Greater investment protection**

The scanner you buy today can meet new workflow needs tomorrow

**Better adaptability**

Scanners and your workforce will be ready to meet new challenges and opportunities

**Lower operational costs**

You don't need to purchase different scanners for different applications — simplifying accessories, configuration and management

**Lower training costs**

Just one device to learn, no matter the application
