

ZD510-HC Z-Band Wristbands

Zebra's ZD510-HC allows you to print patient information and barcodes directly on Z-Band direct thermal wristbands.

The wristband is the cornerstone of patient safety. If a wristband fades and fails to scan, patient care and safety and workflows are compromised. Zebra's Supplies Research and Development developed Z-Band to be one of the most durable direct thermal wristbands in the market*. With over 3 billion patients identified since 1998**, you can rely on Zebra.

Z-Band Wristband Features:

- Adult, Pediatric and Infant sizes
- Adhesive and Clip-Closure options
- Resistance to common hospital hand sanitizers
- Silver antimicrobial coating that protects the wristband from degradation
- Latex-free material
- MR-Safe*** level of safety

*For more details on the durability laboratory testing performed, please download our white paper on www.zebra.com titled "Putting Wristband Durability to the Test."

**1998 - 2018

***Z-Band wristbands are made of polypropylene and vinyl. The direct thermal imaging chemistry is composed primarily of leuco dyes and developers. The inks / varnishes used are UV varnishes and water-based inks. There is no metal content in or on these particular patient identification bands. Therefore, Z-Band wristbands are considered to be MR-Safe.

Zebra Z-Band wristbands are available with adhesive or clip-closure, in a variety of sizes and colors to meet your organization’s needs.
