# Putting Sustainability at the Heart of Our Products

When it comes to creating sustainable products, Zebra is committed. From company-wide global initiatives to the end-to-end product life cycle from manufacturing to retirement, our green initiatives protect the planet—and the people who make and use our products.

## Sustainable Materials

The device contains over **31% post-consumer recycled plastic/material**

### Eco-friendly attributes<sup>1</sup>

- No mercury
- No PFO/PFOAs
- No latex
- Compliant with global RoHS requirements

### A-to-Z sustainable packaging

Our corrugated packaging is 100% curbside recyclable

- 92% biodegradable packaging, by weight including a bio-based TPU retention film
- All paper inserts are made with FSC Mix certified paper
- The cardboard box contains a minimum of 50% recycled content

### Lower consumption of devices, accessories and batteries through maximized life cycles

Most carbon emissions occur in the raw material and manufacturing stages—the fewer devices you use, the more you reduce greenhouse gasses

- Maximized lifecycle with Zebra's rugged design
- 10 years of repair and technical support: no need to retire working devices due to lack of available support<sup>2</sup>
- Device is backwards compatible with legacy host devices

### Smaller Electronics Volume

RS5000X's small size means less electronic material must be manufactured and therefore it has a smaller embedded carbon footprint than a larger device

### Accessible Design

Ring Scanners allow for full use of the hand while scanning, without putting down the device. RS5000X improves accessibility with a more visible laser crosshair and a larger trigger button for gloved use on the freezer version.

## Zebra's Circular Economy provides life-cycle management of products that reduce your overall carbon impact

### Takeback Recycling Program

Zebra may offer free recycling for selected end of life devices and will provide a certificate of destruction upon request. Conditions apply

### Device Buy-Back Program

Your end of life devices may be eligible for a device buy-back, enabling a 'green' upgrade to the next generation device

### Certified Refurbished Device Program

Purchase or rent Certified Refurbished devices, which perform like new and may include end of life products, to meet season surges and bridge gaps to a tech refresh
